

Demand-side Management Programs for **Water Utilities**

INDUSTRIAL, COMMERCIAL, and INSTITUTIONAL (ICI) Water Efficiency Programs

On-site evaluations
of large water users

Experienced engineers
and scientists share
their skills to reduce
customer's costs

Reports detail cost /
benefit analysis for
customer's water-use
improvements

Most cost effective
approach to control
long-term demand

Funded by North
Carolina state
government

Waste Reduction Partners

Waste Reduction Partners

What does Waste Reduction Partners do?

- Helps customers identify and evaluate water efficiency opportunities through facilities assessments.
- Analyzes water consumption data and visually audits water uses throughout the facilities.
- Delivers a comprehensive report with recommendations for cost savings through improved water efficiency.
- Educates customers about their historical water use profiles, trends, water balances, benchmarks, cost/benefit analysis and recommendations.

Who uses Waste Reduction Partners services?

- WRP works with local water utilities in support of their customers.
- WRP provides assessments directly to Industrial, Commercial and Institutions (ICI) organizations.

How is work performed?

- Waste Reduction Partners uses engineers, scientists and executives who have retired from their principal occupations.
- These volunteers have extensive practical experience. WRP has served 2200 clients since 1992.

Partnerships

- WRP is a program of Land-of-Sky Regional Council and Triangle J Council of Governments. It works in partnership with the NC DEAO.
